HARSHIKA TIRPUDE

Technology Project Management | Agile Delivery | SAP AMS Governance

+91 8668470643 | tirpudeharshika@gmail.com | linkedin.com/in/harshikatirpude | euphoria1101.github.io

PROFESSIONAL SUMMARY

Project coordination and PMO professional with 2.5+ years of experience across Agile mobile application delivery and enterprise SAP AMS engagements. Primary delivery coordinator for three application initiatives, including two CTO-accepted pre-launch builds; subsequently supported service transition, client-facing offshore delivery coordination, KPI governance, and reporting automation for a 42–45-consultant AMS engagement. PRINCE2 Agile Foundation certified.

PROFESSIONAL EXPERIENCE

DILIGENT GLOBAL | Associate Consultant – PMO **Apr 2025 – Present**

- Supported governance across three concurrent SAP AMS engagements spanning Hong Kong, the Philippines, and a global manufacturing client; monitored incidents, service requests, changes, escalations, and service KPIs.
- Supported mobilization of a Philippines-based SAP AMS engagement, coordinating onboarding/access dependencies, backlog intake, operational follow-ups, and reporting for a current team of approximately 42–45 consultants.
- Performed acting offshore service delivery responsibilities during transition periods, independently leading selected client discussions and presenting operational updates alongside account and onsite delivery leadership.
- Developed Excel VBA reporting automation and an AI-assisted tracker workflow, reducing recurring report preparation from approximately 3–4 hours to 7–12 minutes (estimated 93–97% time reduction for comparable scope).
- Built dashboards for inflow/outflow, throughput, aging, open backlog, technician/module performance, and SLA/due-date tracking; coordinated ticket hygiene, UAT follow-ups, and customer-dependent approvals.
- Automated reporting for a Hong Kong SAP AMS account, reducing daily report and standup-deck preparation from approximately 2 hours to 30–40 minutes; coordinated change-readiness checks and UAT follow-ups.

HYVE AI LABS (formerly Wisho) | Project Coordinator **May 2023 – Jun 2024**

Remote · UK-based startup

- Functioned as the primary project delivery coordinator for three mobile application initiatives, working directly with the CTO and a cross-functional team of approximately 10 developers, designers, and contributors.
- Created Agile sprint backlogs, coordinated developer task selection and technical dependencies, tracked progress, and facilitated sprint reviews independently or with the CTO; developers owned effort estimates.
- Coordinated UI/UX reviews, frontend/backend development, API and functional testing, defect follow-ups, and validation of weekly and urgent builds.
- Coordinated two mobile applications—a social wish-sharing platform and a UAE parking reservation platform—through CTO acceptance as development-complete, pre-launch builds; supported a third local e-commerce application during development.

CORE SKILLS & TOOLS

Project delivery: Agile/Scrum, sprint backlog management, requirements coordination, cross-functional delivery, stakeholder communication, sprint reviews, risk/issue tracking, UAT and release readiness

Service governance: SAP AMS, incident/service request/problem/change coordination, KPI/SLA monitoring, backlog aging, ticket quality, governance decks, service transition

Tools: Excel (advanced reporting, VBA, pivots), PowerPoint, Jira, ClickUp, OneApp, SharePoint, Outlook, Figma, Postman/API testing, Claude-assisted reporting
